General Grant Again Resumes Consideration of His Book---The Throat Disease.

The President Recognizes Two Indiana Men in His Appointments

To-day.

BOUND FOR HEAVEN.

Dunning Their White Robes .

By Telegraph to The Sexuser

Boston, April 29.-A dispatch from Corinna, Me., says that forty or fifty people in that town expect to go to Heaven to-day. A prophet named John Nickerson has been laboring there and made many converts. Nickenson and his disciples make the vision in the seventh chapter of Daniel the basis of their belief. They solemnly arow the coming of the Son of man is due to-day and are making preparations accordingly. The believers did not sleep last night. This morning at 4 o'clock they assembled at their tabernacle, put on their white roles and use waiting for the end,

GENERAL GRINT

Better Then at any Time for Months. ily Telegraph to Ter Sexusar

New York, April 23,—General Gran became quiet a little after 10 last night and at 11 he slept. From that time until 8 a. m. he slept well with occasional wakings. This morning he felt better and stronger than on Sunday. Dr. Douglas remarked that though there was some thickness of speech General Grant had better and easier command of the organs of speech than has been the ase since the attendance of the doctors became constant. He said the general was better than at any time in months.

The ulcerations of the portions of Gen. Grant's throat from the broken down tissues have been sloughed away have materially improved, but the cancerous trouble is neither dessened nor is it at present aggressive. It is simply quiescent. His general system is improved. The weather, although unpleasant, has been as a tonic to the system of then Grant. That deprossing element of former days is wanting and the patient feels brighter and more vigorous. He loss now so far improved physically that his mind is becoming engaged with the blockout work upon his book. This occupies his faculties and the result is good.

The Opinion of the Murney-lieneral Ret atire to the hale of Martingest Imada.

"Can the county suditor proceed t sell mortgaged lands," State Superintendent Holoombe asks Attorney General Hord, "under mortgages given to the school fund at any time, after proper notice, on failure to pay any installment of interest when the same becomes due, or must be make all sales on the fourth Monday in March in each year?" In snewer to the question the attorney general states that it is his opinion "that in case of a failure to pay any installment of interest when the same becomes due, the county auditor is authorized to sell the land at any time, after sufficient and proper notice. He may sell at any time after defalcation by the creditor, and lawful notice thereof, but must offer for sale on the fourth Monday in March annually, all mortgaged lands on which payments of interest are due on the first day of January and unpaid on the day of the sale."

THE KAIGHTS TEMPLARS

The Pirot Incu of Their Thortu-Pirot in Reports.

The Grand Commandery of the Knights Fem plans of Indiana began their thirty yesterday afternoon, with Grand Comnander Walter Vaile, of Michigan City, presiding. There are a large number of the members of the order in attendance. among them R. F. Keith, H. W. Mord-hurst and R. B. Greene, of this city.

The report of the secretary showed that the membership, which numbered 2,359 in 1883, had increased to 2,429 The largest commanderies are Raper, Inliampolis, with 176 members; Anderson, 162; Fort Wayne, 138, and South Bend,

The treasurer's report gave the follow ing etatement of the condition of the finances: Receipts—balance from previona year, \$3,000,40; receipts since conclave, \$2,650; total, \$5,656.40. Expenses loss by bank failure, \$743.50; expenditures, \$2,268.40; total, \$3,011.90; balance in the treasury, \$2,644."

The Strike at the Murray Foundry

When the 7 o'clock whistle sounded in the Kerr Murray foundry to-day, but two men reported for duty. Mayor Zollinger and the police force were present, but as the strikers molested no one the police went home. The workmen say want the wages of last summer restored, but D. A. Cressler says it is impossible to do that and will as rapidly is possible fill, the vacant places new workmen. He says he will not permit strikers to go to work and is partic ularly embittered againt the leaders. He says most of his men are maxious to go to work, but fear intimidation and trouble and stay away. Thus the matter stande.

EXPECTANCY

England Feverishly Anticipates a Diplomatic Rapture and Consequent War With Rossia.

Russia is Preparing for War More Effectually Than England Believes.

Gladstone's Speech Makes an Encounter Certain and Stiffens the British Rackhone.

INDICS OPINION

By Telegraph to THE SENTINE

LONDON, April 29,-It is stated the government has received an importan memorandum from Lord Dufferin, upor the views of the Indian government and action of Russia since the beginning of the existing controversy.

Loxnos, April 29, - The current opinion is that Ensais is really preparing for war much more rapidly than she appears to be, the Russian papers, being warned to recrees.

THEY WANT BERAT.

In the house of commons, Lord Edmund Fitzmaurice, the under secretary of foreign affairs, read a telegroup from Lumsden, April 23rd., that the govern ment of Herat had received the report that Russian troops had advanced upon Maruchak. He said General Lumsden binself in a telegram on the 25th,, incilentally speaks of a recent occupation of Maruchak by the Russians.

The speech of Gladatone upon the rote of credit for \$55,000,000 m received with profound interest, throughout Enrope and was published in full in all, the ewspapers. It has dispelled any idea that England will make concessions to Russia. The general opinion of the press is that the speech makes war cer-

A WAR SHIP LAUNCHED,

Loxpoy, April 29. The steel man-ofwar, "Howe," was bounched at Pembroke, Wales, yesterday. She carried ten guns and a crew of 445 men. She is a twin screw, steel armor plated burbette ship, of 9.700 tons and 7.500 horse

THE PATAL EULTURE,

LONDON, April 29. The Times, in a review of the recent past action of Russia says the spirit thus revealed gives little hope that England's last overtures will receive a satisfactory reply. A refusal to treat upon that basis will involve a diplomatic rupture which is little removed from actual war.

diametone's specch.

LONDON, April 28. Mr. Gladstone to-day nisde a speech in the commons leaning decidedly toward "Jingoism." In the course of his remarks, he said, the can not give you all the information we present if would give it, it would not place you in a position for a combine of judgement. Were we to give part, we should infallibly micheal you and therefore we stand simply upon what is patent notorious and say that there is in those patent and hotorious facts with which the whole world is acquainted, cause, and abundant causes. In the course of his remarks he said,

for proparations ["bear, hear,"] Shall are not obliged, God forbid, we should ever be obliged to defend him or any body else, were he to mislead into a course of tyranny against the just resentment of his subjects. We are not bound to sustain him in any course, of evil; but we have a contingent obligation to give him our and l support, think every one who hears me will say that obligation should be fulfilled in no stinted manner. ["Hear, hear,"] 1 have stated distinctly to the house th communications between him and the viceroy of India, and the language he holds and the principles he announce: him to call upon us to act in concert and in council with him; to act for him and as far as we can with him; to protect him in the possession of his just rights. [Cheers.] Well, with this view, a plan was formed for the delimitation of the frontier between Afghanistan and what was only yesterday the Turkoman country, but what has now become by rapid process Russian territory. We have made very rapid progress ourselves in various quarters of the world and the idea. which beyond all, I desire to earry along with me at every step of this painful, and auxious process is the determination to make very allowance and concession to those with whom we are dealing, that we should claim for ourselves. ["Hear, hear."] Therefore, I will only say that this territory has rapidly become Russian and that Russia is now in immediate contact with Afghanistan and the plan made for the delimita tion, of Afghan territory has unhan-

pily been frustated to this extent that it has not yet taken effect in ac tion. The circumstances of the delay may have to be earcfully examined hereafter. I am not about to examine them now, or make the delay a matter of charge, but I must point out a no torious fact that if allowed for military advantages the deleted groundwere obviously, on the face of them, in a high degree dangerous to peace, and dangerous to the future settlement of the question; however, we set ourselve to bring about an agreement with Rusis by which we hoped those dangers might in a greater degree, be neutralized. That agreement was concluded on the 16th of March, although it has passed by the 17th of March, inasmuch as I think that was the date on which as I think that was the date on which it was belgraphed to Sir Peter Lumsten. The agreement consisted of a covenant and a consideration. The covenant was that the Russian troops should not advance or attack, provided the Afghan troops did not advance or attack. There followed a reservation, and the case reservation was that, unless in the case Refervation was that, unless in the case of some extraordinary accident, such as a disturbance in Penjdeh, the "statu quo" should remain unliss turbes! Come what may ["Hear, hear"]! am bound to say that atthough the house was somewhat startled to the reservation. I believe the agreement was accepted by the house as a binding covenant. It was a very solemn covenant, involving great issues. There were thousands of mensues. There were thousands of me on the one side standing for thei country, and on the othe side for what they though side for what they thought their patrotte dury, placed in position of dangerous configury in in danger of a bloody collision. This engagement came between danger and the people exposed to it, and we be lieved that it would be recognized as one of the most sacred covenants be tween two feations ever mode. It is uncertain how it came about and how, And when, and who was to blome and when, and who was to blen [cheers]. All this remains in suspense that would engagement of the Zoch of March distinctly showed there are party or both head, either through all will or through all will or through all will or through all conditions of the en agement, and we consider it still to the day all we consider it still to the day all we consider it still to the day all we say it is for the lemor of doth countries to is for the lemor of doth countries to examine how and by whose fault this exhandly came about I will not suffering that we are in the right, and sulthough I have perfect confidence in the honor and intelligence of our officers (cheers). I will not now assume that they may not have been marked.

for preparations ["the ar. hear."] Shall a now in a very few words sketch rapidly and slightly the outlines of those patent and notorious facts." The starting point of our movement in this cause is our obligation of hono-to the ameer, who stane's between us and any other consideration of policy. But our obligations to him are not absolute. We was the provocation is among tablesed for facilities we should. We know that the attack was a Russian at not abliged for facilities we should. We know to a stack. We know that the Afghans suffered in life, in spirit and in repute. We know that a blow was struck at the credit and authority of a soverign, a soverign who is our protected ally, and who had committed no offence. All I say is, we cannot in that state of things close the book and say, we will open it no more, we will do our best to have no more, we will do our best to have the right done in the matter under these circumstances. This is a cause these circumstances. This is a cause for preparation and I hope that the house will feel with me after what I have said, the necessity we are under, of making the Soudanese funda available for service elsewhere. I hope the house will not press upon us a demand for time which can have no other effect than propagating here and elsewhere, the belief that there is some indicision in the minut of parliament, [Lond cheers], whereas as I herent, [Lond cheers], whereas as I here onne indivision in the mind of parliament, [Lord cheets], whereas as I believe, that with one heart and one soul and one purpose only, while reserving the absolute liberty of judging the conduct of the government and visiting them with its consequence, the house will go forward to perform and most the demands of justice and the calls of homor, and labor for the purposes of peace." [Lord and general cheets.] Anter Sa Stiff comer.

By Telegraph to Tim Servicer.
Series, Mass., April 28.—Judge Endicoft, secretary of wor, was asked about the alleged difference between him and Lieut, General Sheridan. He said he knew of no difference between them."

DISTRESS IN CHICAGO.

To get rel of the distress caused by such an intruder as rheumatism is one of the puzzles of the present age. Happily the new and popular remeity—Athlephorus—has come to the relief of this distress, and it finds its way in-to the homesof surfer rs, not only through the drug stores, but at the hands of the medical faculty.

medical faculty.

A correspondent while passing through thicage, called on Jr. II. W. Joy, who is well known as one of the county physicianscharged with the leneficent duty of relieving the distress of the pion. In addition to this work Jr. Joy has an extensive practice of his own. It had come to the knowledge of our correspondent that Jr. Joy was making use of Athlophoros, and had met with success with it in treating rheumatism and neuralgias.

Calling on Jr. Joy at his office, corner of State and Harrison streets, he found the doctor very basy with a procession of patients who were seeking relief from various aitments. He also found the Dector quite wilting to recoverse on the subject,

quite willing to converse on the subject, and to give Athlophoros full credit for what it had done in conquering these troublesome diseases.

and to give Athlophoron full credit for what it had done in conquering these troublesome diseases.

Said Jactor Joy: "Within the past year I have given Athlophoron a very fair trial among sofficers by theumatism, some of whom were old people and had been troubled with the disease for a long time. I have also used it in cases that were not of such long standing. My experience has been that it is uniformly successful, and that it surpasses all medicines I have ever seen for expelling rheumatism from the system. My first acquaintance with it was from a sample bettle which was left at the house. It occurred to me to make an experiment with this, and the experiment was so successful that I determined to make an experiment with this, and the experiment expular use of the medicine. In some cases it acts immediately, in others not so quickly, but in all cases surely. I have never yet been disappointed in it. It is not an opiate to buil pain, as morphine does, but it carries away the cause of the pain, which is far better. I cannot see that it leaves any mischierons effects, as morphine and other opiates do. Sometimes after the first relief I have to administer Athlophora again, and keep on for a while, notably in cases in which the malady is of long standing. But in many cases I have found the cure both speedy and permanent.

"As to neuralgia, I have not had so many cases, but enough to assure me of the value of Athlophoras in overcoming it. I have no hesitancy in using, in my practice, anything which I find powerful to do what I want—namely, to cure disease." Mr. M. Tihon, who transacts basiness at 164 La Salle street, had been a sufferer from rheumatism, and was found at his office.

164 La Saile street, had been a subtreet from rheumatism, and was found at his office.

Said Mr. Tilton: "I have indeed suffered greatly with rheumatism; my sufferings extending over a long series of years, My feet and hands were distorred and my joints were extremely painful. I had tried all the remedies I knew of. Some of them did no good at all, while some gave partial and temporary relief. I at last tried the new remedy, Athlephorus, and I am very free to say that this produced a rapid change. Athlephorus is the best medicine in the world. At first I was a little namested by it, but I was not discouraged, for from the very first I felt that it was acting on me with marked effect. The continued use of it drave out all the pain of rheumatism and all the distortions and swellings. Now I am as well as ever, and am, as you see, able to attend to business regularly.

"My wife had rheumatism, and wascured by a bottle of Athlophorus. My daughter, who is a fine piants, thus ettled in the ends of her fingers, enlarging the joints and making it almost an imposibility for her to play on the piano. Half a bottle of Athlophorus was all she took. The rheumatism hy it. One friend who half wasting at first thought that Athlophorus was doing him no cool. But he persected, and so in obtained relief."

Gentle \mathbf{Women}

Who want glossy, inxuriant and wavy tresses of abundant, beautiful Hair must use LYON'S KATHAIRON. This elegant, cheap article always makes the Hair grow freely and fast, keeps it from falling out, arrests and cures grayness, removes dandruff and itching, makes the Hair strong, giving it a curling tendency and keeping it in any desired position. Beautiful, healthy Hair Is the sure result of using Kathairon.

Wayne Paint and Color Works,

No. 12 West Columbia Street Fort Wayne, Indiana.

No. 12 West Columbia Street Fort Wayne, Indiana.

And others wanting First-class Paints: Do you know that you have in Fort Wayne a Manufacturer of Mixed Paint and Grinder of Colors, where you can buy your Paints from first hand instead of paying the middle man his profits, which are washed as one of the old citizens who has helped build up Fort Wayne, and his helped build up Fort Wayne, and his knowledge of Paints and the composition of pigments to form different shades and tints is the knowledge of Paints that a mere dealer cannot have for he does not know anything about Paints, as he buys them sealed up and he cannot tell you what it takes to make this or that shade. All he knows is what the label on the can says. Neither can he tell you shades that will or will not fade. By buying your Paints of O. L. STARKEY you can get all the information you want. I am making Liquid Paints in all shades and colors; also the same shades and colors in peste form, the same thickness as white lead and requires thoming down the same as white lead. I making the different shades my formulas are all tworoughly mixed to gether in the powder mills, then wet down and run through a mixing machine, and into the make by hand. Call or send and get some of my sample cards of colors and tints; also see elevations of gothic inoses colored up with foar and five shades, which will give you a good blea how to paint and ornament the ontaide of your houses.

I say again, do not buy of the middle man if you want to save money. I will guarantee my priors and quality of goods with any manufacturer in the United States.

Do Not Forget the Place, No. 12 West Columbia Street, Fort Wayne, Ind. The following are my prices until further notice:

MIXED PAINTS READY FOR USE, Cottage Colors, per gallon, Sic to \$1,15 Cottage Colors, per quart, 25c to 30c. Cottage Colors, per pint, 12/2c to to 15c. Prepared Paints, in paste form, twenty different shades, per 100 that, \$5.85 to area.

Double washed Ochre, all shades, 2; to

Great Problem of Life.

To preserve it ought to be the study of

CatarrH

Diseases Tending to Con-sumption, Symptoms, Ef-fects, Treatment and

Dr.Nicholls

Robinson House,

Among the list of chronic diseases which affect the human frame Catarrh is the most prevalent, most offensive and most preductive of disconfort, and of a variety of distressing and dangerous complications.

So copious and offensive is the discharge in many cases that the pa-tients express their belief that their heads are one mass of corruption.

"HAWKING"

"HAWKING"

Most of the discharge passes backward, either dropping into the throat, or collecting as a tough, viceid tenacious ublegm, behind and above the soft palate in the passage between the throat and the head. Its ledgment embarrasses respiration, and creates a constant and almost resistable desire to relieve the discomfort by drawing the offensive autance into the throat by a loud insuffation through the nose, so as then to be able to eject by a disagreeable "hawking."

In the more advanced stages the dis-charges are generally of an offensive odor, causing great survoyance to ode's friends and to the patient himself, while his sense of smell remains. This annoy area from the odor becomes almost be youd endurance, more especially when the discuss assumes the form of ozena, and the delicate hones of the nose be-

In neglected cases, when the bones of the nose become diseased, not only in the offensiveness of the breath greatly increased, but there is a liability to se-rious personal deformities, among which is the flattening of the nose.

TARRH
The swallowing of catarrhal secretions deranges the functions of the stomach, causing indigestion, loss of appetite and health. Debility, deafness, paleness, haseitude, healache and disturtance of mind soon follow. In some instances the mental affections is one of irritability, the patient being induly samoyed by all the little perplexities of life. In others the prominent feeling is that of melancholy and depression of appirits, when the invalid can see no hope in the future for himself or his affairs.

CONSUMPTION and DEATH

CONSUMPTION and DEATH
Catarth affections unchecked by treatment are prone to extend by continuity of surface along the natural air possages to the substance of the lungs, thus causing consumption and death. In this connection it should also be remembered that the air which enters the lungs of a catarthal patient is, every breath of it, poisoned by exhabitions from the foul secretions of the diseased surface. By such air the blood cannot be properly purified and male fit to impart healthy vigor in its unending circuit to all and every part of the animal mechanism. One would suppose that this consideration alone would be sufficient to induce every jernon thus afflicted to make early application for relief.

TREATMENT AND CURE. CONSUMPTION and DEATH

TREATMENT AND CURF

By the system of treatment which Dr. Nicholis has adopted and pursued for years with uniform success, a complete and permanent cure of this repulsive disorder can be effected. This he has demonstrated in thousands of cases, representing the disease in every form and all its various stages of development. He arrives to the contract of the contract o all its various stages of development. His applications are made to reach the decease! parts in the most direct and positive positive manner, instantaneously penetrating every cell and excity of the head communicating with the mostrile, and subjecting every perion of the remisrance to the healing action of the least results, and without ransing the least pain or unpleasant sensation.

So effective is this plan of medication that a single application is generally pro-

So enserive in this plan or memeation that a single application is generally pro-ductive of decided relief. The affected

ancewsfully treated by Dr. Nichola. A permanent cure guaranteed in all chronic

Office hours from 9 a.m. to 8 p. m.

Fort Wayne, Ind.

variety of distressing and dangerous complications.

Its earliest and most prominent symptom is a discharge from the head, varying in its nature in different cases, and even in the same individuals at different times. It may be a thin, colorless, orid fluid or a glary, starch like substance. Generally, however, it is a thick purulent or mucu-purulent matter, either ash color, greenish yellow or a deep green introcessionally streaked or freeked with blood. So copious and offensive is the

OFFENSIVE BREATH.

DEFORMITY OF THE NOSE

FATAL EFFECTS OF CA-TARRH

cavities are thoroughly cleaned from enemated morbite matter, the off-mire smell is removed, and relief from other sment is removed, and relief from other fromblesome symptoms is almost imme-diately experienced. The discharge soon diminishes, urritation is allayed, the in-flammation subsides, ulcerations are made to lead and finally a radical and permanent cure is affected. All Diseases of the Eye and Ear
